 - i. 2019 Capital Plan: Due to San Bernardino County's pavement schedule, all pipeline replacement was postponed until 2020. Office upgrades were made, including new billing software, computer hardware, fireproof cabinets, and LED lighting was installed. The cost of the new LED lighting was equivalent to our annual hazardous waste disposal of the fluorescent light bulbs previously used. Upgrades and repairs were made to the clubhouse and minor system upgrades were also made. Phase 1 of the construction debris cleanup and hazardous waste removal was completed.
 - ii. 2020 Capital Plan: The pipeline replacement program was doubled in 2020 to include both Fern and Canyon Drive. Pipeline replacement totaled 2,463 feet, the installation of three hydrants, and 47 new meters, at an approximate cost of \$132.00 per linear foot, which is 50-66% below the average cost of similar projects executed by other water agencies within the State. Phase 2 of the construction debris cleanup was completed, completing the entirety of the project. Pumphouse upgrades were made to comply with new State requirements. A condition assessment was performed on the dam based on 2019 and 2020 reports from the Department of Dam Safety to establish the scope of the 2021 dam restoration project.
 - iii. 2021 Capital Plan: The dam restoration project was completed in January 2021. Due to the methods utilized, significant savings were made to the shareholders and the lake did not need to be drained. The State recommended methods would have cost over \$500,000.00 plus an additional \$50,000 in permit fees. Upgrades to the system with regard to treatment are being assessed, as well as an internal infrastructure condition assessment to help prioritize the needs and future maintenance of our system.
